Opportunities in Time-Domain Extragalactic Astrophysics with the
NASA Near-Earth Object Camera (NEOCam)

White Paper Description

*(350 character limit; coming in at 349 characters::) **

This White Paper motivates the time domain extragalactic science case for the NASA Near-Earth Object Camera (NEOCam). Using the NEOWISE-R model, for relatively little cost, additional NEOCam data processing will have a massive scientific and legacy impact on extragalactic science, especially in the nascent field area of AGN IR variability studies.
